Australian Universities Quality Agency

Issues for your consideration today include:

1. How can we ensure that OER courseware meets some agreed set of standards?

2. How can we provide sufficient information about the OERs to allow judgements about their quality or appropriateness (ie whether they do in fact meet the agreed standards)?

3. How can QA agencies accredit programs built upon, or institutions that use, OERs – and do it in a way that will lead other institutions to recognise the resulting qualifications or give credit for partial qualifications?

I wish you well in the discussions

Thank you!
